SUPPLEMENT TO SECOND INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Further to the Second Information Disclosure Statement filed on August 17, 2009, the accompanying information is being submitted in accordance with 37 C.F.R. §§1.97 and 1.98.

Applicants now provide the below English -language translations of the Abstracts for CN 2127873Y and CN 2141286Y filed with the August 17, 2009 Information Disclosure Statement:

CN 2127873Y

This utility model involves one continual vacuum breast pump, which belongs to the health care product range. It is composed of the glass breast pump and the air pump with the air- in one way valve (4) and the air-exhaust one way valve (6) on the air pump that may lead to the stimulation to the baby to suck the milk in a continual and rhythmical way. The frequency can be controlled by user and it prevents the breast shin impairment.

CN 2141286Y

This utility model provides an improvement to suck the milk and breast enrichment. It's significant feature is having two one way valves in the hollow rubber ball , one of those connects by a hose to a milk bottle, and the other one links with the atmosphere which locates at the channel between the bottle and the hollow rubber ball. This new model can provide a larger negative pressure for collecting the milk when connecting the bottle, for breast enrichment when taking out the bottle.

The Director is hereby authorized to charge any appropriate fees under 37 C.F.R. §§ 1.16, 1.17 and 1.21 that may be required by this paper, and to credit any overpayment, to Deposit Account No. 02-4800. This paper is submitted in duplicate.

Respectfully submitted,

BUCHANAN INGERSOLL & ROONEY PC
